PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of full-time experience (3.5+ years including internships) building and running cloud platforms on AWS, GCP and Azure. Built a hub-and-spoke architecture on all three clouds from one Terraform blueprint (40+ modules), cutting provisioning time by 60%. Runs 15+ Helm releases on private EKS and GKE with no static credentials, behind CI/CD with security scanning at every stage.

CORE SKILLS

Cloud (AWS):	EKS, ECR, EC2, ALB/NLB, WAF, CloudFront, Transit Gateway, Network Firewall, RDS, S3, Secrets Manager
Cloud (GCP):	GKE, Apigee X, Private Service Connect, Cloud Armor, Cloud CDN, Cloud SQL, Artifact Registry
Cloud (Azure):	AKS, ACR, Key Vault, Azure Firewall, Front Door, Application Gateway
IaC & Automation:	Terraform (40+ modules, multi-environment), Helm, Ansible, Bash
CI/CD:	Azure DevOps, GitHub Actions (OIDC), GitLab CI/CD, Jenkins, Argo CD, AWS CodePipeline
Containers & Mesh:	Kubernetes, Docker, Istio, NGINX Ingress, ECS/Fargate, Docker Swarm
Security:	HashiCorp Vault, Secrets Store CSI, Workload Identity (IRSA, GCP WIF, Azure), Trivy, Gitleaks, SonarQube
Observability:	Prometheus, Grafana, OpenTelemetry, Jaeger, Loki, CloudWatch
Languages & OS:	Bash, Python (basics), Go (basics), Linux (Ubuntu, CentOS), Git

WORK EXPERIENCE

DevOps Engineer | [Ksolves India Limited](#) | Noida, UP Oct 2024 – Present

- Built a hub-and-spoke network on AWS with 40+ Terraform modules: shared ALB, WAF, CloudFront, NAT and VPN in the hub, EKS, RDS and ECR in private spokes behind Transit Gateway. Cut provisioning time by 60% and removed all direct internet exposure from workloads.
- Implemented the same design on GCP (Apigee X, Cloud Armor, Private Service Connect) and Azure (AKS, Key Vault CSI, VNet peering) from the same Terraform blueprint.
- Built a 3-stage Azure DevOps pipeline that provisions the hub, starts a self-hosted autoscaling agent, creates the spoke and registers its internal NLB with the external ALB; one run creates a complete environment with no manual steps.
- Replaced all long-lived GCP service account keys with Workload Identity Federation, and added scheduled start/stop of non-production compute outside business hours to reduce cloud spend.
- Run 15+ Helm releases on private EKS and GKE (application portals, Vault, Apache NiFi, RabbitMQ, ClickHouse) with Istio routing, HPA, and zero static credentials (Vault + CSI + workload identity).
- Added security gates to every Kubernetes delivery pipeline (Trivy image scanning, Gitleaks secret scanning, SonarQube quality gates) that block flagged artifacts before pre-production.

DevOps Engineer | [BUOPSO Pvt Ltd](#) | Noida, UP Feb 2024 – Jun 2024

- Deployed Docker Swarm across bare-metal VMs with resource limits, replica counts and start-first rolling updates, keeping 8 microservices running without downtime and cutting developer environment setup from 2 days to under 2 hours.
- Set up GitLab as the team's delivery platform with branch protection, MR approvals and build, test and deploy pipelines, giving 3 product squads one consistent release process.
- Moved database credentials and API tokens out of application configs into HashiCorp Vault with TTL-based rotation and per-service policies, and added OWASP Top 10 WAF rules in front of public APIs.

KEY PROJECTS

RCA AI Agent: Deployment Failure Diagnosis (AWS, Claude Opus 4.5)

- Built an AI agent that diagnoses failed ECS/Fargate deployments from CloudWatch logs, explains the root cause and suggested fix in plain English, and posts it to the team through CodePipeline.
- Fixes run only after human approval, under a tightly scoped IAM role, with a full audit trail in RDS. Reduced average time to resolve deployment failures from 45 minutes to under 10.

Multi-Cloud Hub-and-Spoke Reference Architectures (AWS · Azure · GCP)

- Public Terraform repos for the pattern on each cloud: centralized egress through Network Firewall / Azure Firewall, Apigee X over Private Service Connect, private EKS, AKS and GKE with workload identity, and keyless GitHub OIDC deploys gated by TFLint, Trivy and Gitleaks.

EDUCATION

B.Tech, Mechanical Engineering · Ganga Institute of Technology & Management, MDU	2024
Diploma, Mechanical Engineering · Pusa Institute of Technology, BTE	2019
